

The Awareness of Social Inference TEST (TASIT) Manual (3rd Edition)

Table of Contents

Acknowledgments

Preface

Chapter 1: Introduction

Major Components of Social Cognition

Social Cognition as a Target for Remediation

Chapter 2: Description of Tasit

Part 1 – Emotion Evaluation Test

Parts 2 and 3 – Social Inference

Part 2: Social Inference – Minimal

Part 3: Social Inference – Enriched

Parts 2 and 3 – Response probes

Chapter 3: Administration and Scoring

Materials

Part 1: Emotion Evaluation Test

Administration Instructions

Scoring

Part 2: Test of Social Inference – Minimal

Administration Instructions

Scoring

Part 3: Test of Social Inference – Enriched

Administration Instructions

Scoring

Chapter 4: Normative Data

Adult Norms

Part 1: Emotion Evaluation Test

Part 2: Social Inference – Minimal

Part 3: Social Inference – Enriched

Adolescent Norms

Demographic Characteristics of the Adolescent Normative Sample

Demographic influences on TASIT performance

Age

Adolescence

Adulthood

Language background

Gender

Education and Intelligence

Chapter 5: Psychometric Properties

Reliability

Equivalence of forms for English speakers

Reliability estimates based on adult speakers with brain injuries

5 | The Awareness of Social Inference Test (TASIT) – Manual (3rd Edition)

Practice Effects

Reliability estimates based on people with schizophrenia

Construct Validity

Performance of specific clinical groups

Traumatic Brain Injury (TBI)

Autism Spectrum Disorders

Schizophrenia

Frontotemporal Dementia

Alzheimer's Disease

Contributions of the right and left hemisphere and the corpus callosum

Other clinical populations

Correspondence with other neuropsychological measures

Correlation between TASIT and measures of real world performance

Chapter 6: Clinical applications

Diagnosis

Identification of strengths and weaknesses

As a tool for remediation activities

As a means to evaluate treatment effectiveness

Formula for evaluating individual change
